Contact

Phone: +91 8367716255

E-Mail: bharath197997@gmail.com

Address: Visakhapatnam, Andhra Pradesh

Education

Bachelor of Technology , Artificial Intelligence and Data Science.

Dr. M. G. R. Educational And Research Institute. Chennai . (CGPA - 8.8)

2021 - 2025 (Present)

Intermediate (MPC), Board of Intermediate Education

SASI new gen junior college. Vellivenu (MARKS - 972)

2019 - 2021

Secondary Education

Sri Chaitanya techno school. Kurmannapalem. (CGPA - 10)
2019

Skills

Web Design

Power BI

Front End Coding

SQL (Database)

JAVA

Leadership

Language

- English
- Telugu
- Hindi

About Me

As a dedicated and motivated student, I am seeking opportunities to apply my academic knowledge, skills, and enthusiasm to contribute effectively to Innovative projects in Machine Learning. Eager to gain practical experience, develop professionally, and make meaningful contributions to a dynamic team or organization.

Projects

Weather Forecasting

With The Weather Forecasting helps the user to observe the weather for the next 5-6 days and 3 hour interval by searching locations and city names.

The app is developed by using the React.js and material - UI.

Languages : JavaScript (97.1%) , CSS (1.5%) , HTML (1.4%)

Multi-Disease Prediction by ML using Streamlit Python

It predicts probable diseases by mining data sets such as Covid -19 , Chronic Kidney diseases and heart diseases . To the best of our knowledge in the area of medical big data analytics none of the existing work focused on both data types. Proposed algorithm reaches 94.8% with a convergence speed faster than machine learning diseases risk prediction algorithm.

Anti Money Laundering System

Our blockchain-based anti-money-laundering system aids in the security of suspicious transactions and all associated information. Here, our system helps in monitoring all of the customer's transaction patterns and determining whether any suspicious activity is taking place. In this project, the front-end involves Html, CSS, and JavaScript and the back-end involves ASP.NET. The IDE used is Visual Studio and the database is MSSQL. The waterfall model is a classical model used in the system development life cycle to create a system with a linear and sequential approach. It is termed a waterfall because the model develops systematically from one phase to another in a downward fashion. The waterfall approach does not define the process to go back to the previous phase to handle changes in requirements. The waterfall approach is the earliest approach that was used for software development.

Certifications

- Certified on "Data Mining" by NPTEL in the year 2024.
- "Python" , " Java" , "Cloud Computing" , " Business Intelligence" by "IBM career education".
- Certified training on " Angular Javascript" by Adroit prolearn Chennai in the year 2023.
